

Food & packaging waste challenge 2014

In November 2012 we set ourselves a food waste challenge. Over four days we weighed the food and packaging waste in the canteen after the pupils had had their lunches. Look at our chart to see how much it weighed. We are going to set ourselves another challenge - to see if we can have less waste than last time. We are asking parents to try to cut down on the amount of packaging in packed lunches and snacks. The school has to pay for all the rubbish to be taken away out of the school budget!
